EDUCATION

Purdue University

B.S. in Mechanical Engineering Technology
Incoming Transfer Student, Fall 2026

West Lafayette, IN

Expected Graduation: May 2028

Bellevue College

Associates in Science Track II
Engineering MRP: Mechanical Engineering

Bellevue, WA

June 2026

EXPERIENCE & INVOLVEMENT

Founder & President Women in STEM @ Bellevue College

Sept 2025 - Present

- Founded a student-led STEM organization from the ground up, establishing officer roles, weekly programming, and long-term club structure.
- Lead weekly meetings featuring hands-on technical workshops (coding, Arduino, 3D design etc) with tutorials to 20-40+ members. Partner with faculty, student leaders, and campus departments to expand access to hands-on STEM learning for underrepresented students.

Vice President Bellevue College Robotics

Sept 2025 - Present

- Co-lead one of Bellevue College's largest technical student clubs, supporting weekly workshops & projects.
- Train students in Arduino, electronics, CAD, prototyping, mechanical assembly, and troubleshooting through hands-on technical activities for 30-50+ members weekly.

President Bellevue Indonesian Club

June 2025 - Present

- Lead club operations & manage event logistics, officer communication, schedules, and planning for campus cultural nights and community-building activities.

ThinkNeuro Software Engineering Practicum Intern ThinkNeuro, LLC

Jan 2026 - April 2026

- Selected for a competitive software engineering internship practicum cohort and awarded an 80% scholarship; received mentorship from engineers and students affiliated with Apple, Uber, MIT, Caltech, etc.
- Built a professional portfolio website using HTML/CSS, & Git/GitHub; practiced software development workflows including version control, feature branching, debugging, UI design, and project documentation.

Shop Assistant & Cashier TRD Toko Sembako Murah (Jakarta, Indonesia)

Sept 2021 - Sept 2023

- Supported daily store operations, customer service, cash handling, sales records, and inventory organization.

PROJECTS

Bluetooth Controlled RC Car | Arduino, C++, CAD, 3D Printing

- Led a team to design, build, and test a Bluetooth-controlled RC car using Arduino/C++, CAD, 3D printing, wiring, and troubleshooting; programmed motor control and joystick communication; guided 15+ students through assembly, coding, and testing.

Automatic Hand Sanitizer Dispenser | Arduino, Sensors, Prototyping, C++

- Designed and built a hands-free sanitizer dispenser using Arduino, a motion sensor, and an electronic dispensing system; wired and tested components, debugged sensor response, and improved dispensing consistency

ThinkCity 2026 International Hackathon - Most Creative Idea Award

- Developed a smart-city prototype addressing homelessness by connecting Seattle's unhoused community to job opportunities and local support resources with South Korean exchange students, professors, and industry mentors.
- Won "Most Creative Idea" award at an MLH and City of Bellevue-sponsored hackathon with 100+ attendees.

SKILLS

CAD & 3D Modeling

C++, Java, HTML/CSS

Arduino Prototyping & Circuit Wiring

Git/Github & VS Code

Data Analysis

Leadership & Mentoring
